How do USB adapter speeds work?

2020/05/07

So I'm looking for a wifi adapter online, and I see these fast usb adapters speeds like 150 mbps. So how does this work? Does the wifi adapter have the ability to offer the 150 mbps speed or is it just the limit for the speed that the wifi adapter can offer? By the way, I have a 20 mbps net speed so what usb adapter can you recommend me to buy? THANKS IN ADVANCE!!!

## gps jammer definition
